Notice of Allowability

Part of Paper No. 0303

U.S. Patent and Trademark Office PTO-37 (Rev. 04-01) Application/Control Number: 09/830,303

Art Unit: 2834

DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-14 are allowed.
- 2. The following is an examiner's statement of reasons for allowance.

Schmidt clearly teaches the construction of an inductive displacement transducer with unipolar output comprising:

electric windings including a first primary winding, and a pair of secondary windings mutually connected in phase opposition;

a magnetic core, for performing linear displacements relative to the electric windings;

a pair of input terminals electrically connected to said first primary winding and adapted for being electrically connected to a power supply unit; and

at least one output terminal electrically connected to the electric windings.

Bettle teach the use of a second primary winding being electrically connected to the first primary winding mutually connected in series at a connection point, and said secondary windings are electrically connected to said connection point, and to a voltage divider network for the purpose of providing a voltage level on lead is compatible with the remainder of the position indicator circuitry.

The prior art of record, taken alone or in combination, fails to teach the construction of a linear inductive transducer as disclosed by independent claims 1 and 8, having first and second components, indicative of the mutual position between the magnetic core and the primary windings and the secondary windings, respectively.

Dependent claims 2-7 and 9-14 are considered allowable by their respective dependence on allowed independent claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (703) 308-4904. The examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor R. Ramírez can be reached on (703) 308-1371. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-1341 for regular communications and (703) 305-3432 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
